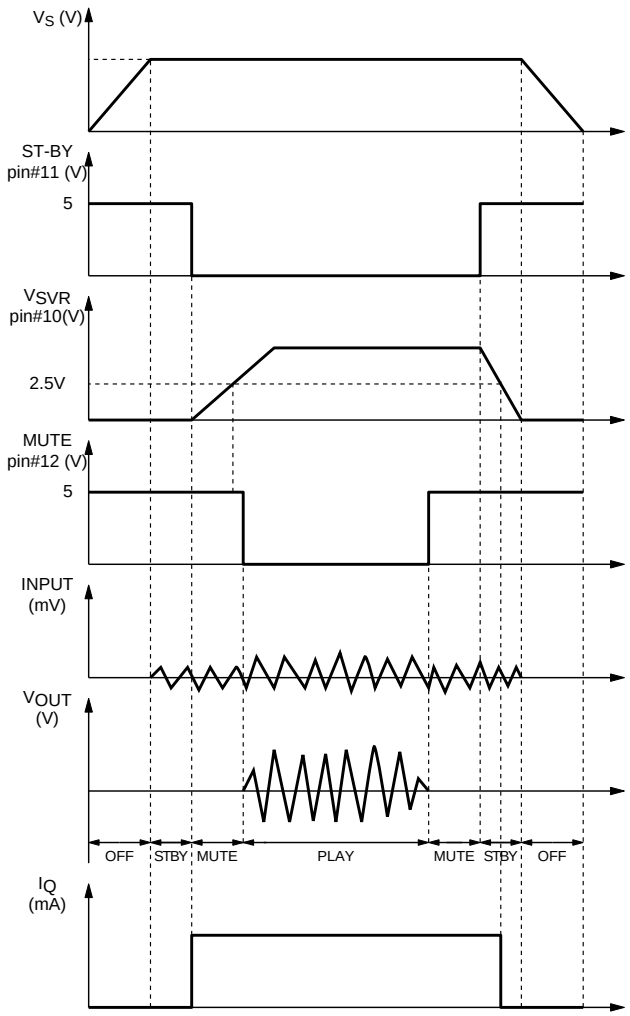
Turn ON/OFF Sequences (for optimizing the POP performances)

A) USING MUTE AND STAND-BY FUNCTIONS



B) USING ONLY THE MUTE FUNCTION

To simplify the application, the stand-by pin can be connected directly to Ground.

During the ON/OFF transitions it is recommend to that the following conditions are respected.

- At the turn-on, the transition mute - play must be made when the SVR pin is higher than 2.5V
- At the turn-off, the FC7496L must be brought to mute from the play condition when the SVR pin is higher than 2.5V.
